April 30, 2014

Dear Mr. Constantin Zelenty,

Thank you for responding to my letter and evaluating it as a presentation of our theory - "**Armenian Theory of Relativity**". I appreciate that.

Just for information purposes you need to know, that I send out hundreds of hundred letters to three political leaders: Her Excellency Dr. Angela Merkel, His Excellency Vladimir Putin and His Excellency Barak Obama, which is almost the same letter with minor political variations.

Except from automated website responses, I received so far only two human responds – both from Embassies of Germany. First respond from the German Embassy in Armenia and second respond from German Embassy in Abu Dhabi.

I like to answer in detail only to your response, because you responded and evaluated my letter as presentation. Also you are advising me how to publish our research manuscript.

My presentation is not just about science but also about politics, which has become so corrupt and that corruption stems downward to all scientific communities, including education systems, scientific institutions and scientific publications as well.

As you recommend to me about my manuscript "*... to turn to relevant scientific journals in order to publish your theory*", I have already tried that long time ago and still trying.

I sent our article for publication to almost all major or regional physics magazines around the globe. So far nobody has accepted our article for publication, because of the same politically incorrect reason.

To prove you my above point I like to focus only on two German physics magazines – "**Annals of Physics**" and "**Zeitschrift fuer Naturforschung (ZNA)**", where I submit our 4 page short communication article-letter "**Armenian Theory of Relativity**".

First submission to Annals of Physics

Submitted **July 21, 2013**

Accepted **July 27, 2013**, (manuscript number **AOP 69342**)

Rejected **August 01, 2013** (*The editor finds your paper, referenced above and coauthored with Haik Nazaryan, BS not appropriate for our journal. There is no formal report.*)

Second submission to Annals of Physics

Submitted **April 14, 2014**

Accepted **April 17, 2014** (manuscript number **AOP 69872**)

Rejected **April 28, 2014** (*The editor finds your paper, referenced above, not appropriate for our journal. There is no formal report.*)

Zeitschrift fuer Naturforschung (ZNA)

Submitted April 26, 2013

Accepted April 30, 2013 (manuscript Ref. No. A13113)

Rejected May 15, 2013 (...it is not suitable for publication in Zeitschrift für Naturforschung A.)

Referee report from ZNA say:

*(I cannot recommend publishing this paper in Z. Naturforschung A. There are several reasons. 1) Physics is not national. 2) There is no experimental hint not to speak of experimental proof, which supports this so-called Armenian theory. 3) A whole bunch of other data has also to be explained. 4) The velocity of light has been found experimentally as a limiting speed. Conclusion: Do not accept. I also recommend avoiding any further discussion on this, in particular not with this referee. )*

Referee forgot the fact that this is only a 4 page short communication manuscript. Our full 86 pages article explains every point which referees say, including the first one.

Dear Zelenty, let's go together to history of science in near past.

Aside 1914 military conflicts and hot wars, there also in 1915 broke out a "war of the minds" between German and British scientists and also between German Physics and Jewish Physics.

The leading theoretician of the Deutsche Physik type of movement was Philipp Lenard (Nobel laureate in Physics), Johannes Stark (Führer of German physics), Rudolf Tomaschek who had re-edited the famous physics textbook Grimsehl's Lehrbuch der Physik and many-many others. In that text-book, which consists of several volumes, the Lorentz transformation was accepted as well as quantum theory. However, Einstein's interpretation of the Lorentz transformation was not mentioned, and also Einstein's name was completely ignored.

War between Deutsche Physik and Jüdische Physik around 1930 was over and winner became Aryan Physics, which unleashed the Aryan brain imagination. Within 12 years (1933-1945), from which 6 years in war, Germans create and discover so many fascinating technological innovations which shaped our lives completely. Even some of the innovations are in the realm of science fiction.

When I am researching physics history in this time period and finding out all these extraordinary technological inventions, which they created, I am astonished to not find any German Theory of Physics.

Right now science is so much politicized that scientists are becoming desperate to break the walls of inquisition in science. Only question is who can break the walls?

That is where the role of Armenian Theory comes into play - to depoliticize science and fill the gap between experimental and fundamental theoretical physics and bring new renaissance in science.

Armenian Theory brings together followers of aether theory and them who reject its existence. There is no contradiction at all. This was all explained mathematically in Armenian Theory of Nature but nobody even gives any chance to explain the theory, because of Evil forces guarding the all doors.

One more example: Central European Journal of Physics I submit our article March 25, 2014 – editor remove it without any reason March 26, 2014. They are really operative when it comes time to change.

Dear Zelenty, the favor which I am asking from you is to help me publish our article "**Armenian Theory of Special Relativity**" in Journal of Annals of Physics and this way clear up hundred years old shame to that oldest scientific magazine.

Best regards,

**Robert Nazaryan**

**Los Angeles, USA**

Subject: AW: This is truly historic time to enlighten the World with Armenian Theory of Relativity

Dear Mr. Nazaryan,

Thank you very much for the presentation of your theory. Obviously, I am not a physicist and therefore not able to have a professional opinion on your theory. However, I am afraid that Chancellor Merkel is not the adequate recipient to your presentation. I recommend to you to turn to relevant scientific journals in order to publish your theory.

Best regards

Mit freundlichem Gruß

Constantin Zelenty
